WO VETERAN COLLEGE DEBATERS SOON TO ENTER LAST INTERCOLLEGIATE CONTEST

Wittkowsky of Camden and Karen of Columbia Have Eniviable Records and Standout Activities at University of South Carolina.

With the passing of the Virginia–Georgia–Carolna–Triangle debate tournament, two of the best and most worthy debaters will be bidding fair for the collegiate spotlight. George Wittkowsky and Coleman Karen will have the opportunity to demonstrate their debating prowess in the school's four upcoming tournaments.

Incidentally this is the third time that the two will compete, having twice met and defeated Florida in the Big Triangle. This seems to be a good sign for the two teams. These two men are the envy of Carolina activities and each is sure to win many college honors to their credit.

Wittkowsky in Too!

George Hayman Wittkowsky of Camden, is this year receiving his law degree. He has been a member of the team to meet the University of Florida five times winning four of the events. He recorded an an even break in the two dual debates with the University of Georgia.

His appearance in the Little Triangle with Clifton and Wofford will be his big spot. City College of New York defeated him in a hard fight. The Inter-Society debate of 1923 was won by him of Virginia is soon to feel the lash of his tongue. In all he has won three of ten and is sure to add more.

Law Notes

ROOT COURT ARGUES CASE ON CONTRACTS

The Law Association held its week meeting Thursday evening, April 11, at the home of Mr. Harris, president. After a business meeting the meeting resolved itself into a moot court.

The case under discussion was an interesting one. A man who had made a contract for the purchase of real estate for speculative purposes held to statute of limitations on both sides of the contract. Aycock placed an opinion in favor of the defendant. He stated in his opinion that he believed that a man should be held to fulfill specific performance of his contract for speculative purposes. The case was argued.

FIRST YEAR LAWYERS ENJOY BIG FISH FRY

The First Year Law Class were guests of the John Rutledge Club Wed.

nesday evening at the Columbia Inn and Gun Club. "Through the kindness of Mr. Rutledge the whole class were permitted to use this fishing site for their entertainment.

The club and its guests left Petti-

College at five o'clock and arrived at an enjoyable evening at the Columbia Inn. Mr. Fied of the Columbia Inn was present to welcome the first year class. The high point of the evening was a discussion of the legal aspects of fishing, which was followed by a criticism of the various methods of fishing. The meeting adjourned at midnight. The club is planning to hold a similar meeting in the near future.

Although the meeting was not advertised to the public, many members of the first year class attended.

When the banquet finished, the host and hostess showed off a plentiful and jolly good fish fry.

Blue Ridge is one of South's Beauty Spots

Blitheworth, in the Vanderbilt estate, is another place of interest. And Mr. Mitchell is one of the most noted scenes of nature's grandeur in Western North Carolina.

The summer homes of the President and various congressmen should be visited by the inquisitive at Blue Ridge. There the pretty girls flock in the summer.

And last, but not least, there is Blue Mountain. A little town three miles distant from Blue Ridge. Every afternoon and evening during the coming season, the dairy and officers may be seen taking to this place.

Blue Ridge itself is one of the prettiest spots in the western part of North Carolina. They are many other interesting places to see.

High Top and Sunrise Peak afford excellent and unapproachable views of the sunrise to the early riser. It is well worth the observer's time and trouble to get up at 4:30 and hike the few miles to either of these places.

Turkey Ridge is a fine place for observing the sun set. There at twilight the heavens are tinted with an infinite variety of colors.

EUPHOROSYNE ARE INTERESTED IN TAXES

The Euphorosynian Literary Society had for its program Wednesday a debate on: "Resolved, That the law providing for a tax on soft drinks should be repealed." On the affirmative were Mr. Rosenblatt and Mr. Vinnegar, while the negative was upheld by Mr. Lockemann and Emily Jay Hopkins.

TALK ON "SPOON RIVER ANTHOLOGY" BY REED

The Wednesday afternoon program of the Hypatian Literary consisted of an interesting talk by Mr. "Damy" Reed. He gave an introduction to Leading Characters in SPOON RIVER ANTIOCHY by REED which concluded the literary program.

RUTLEGEHOLD REGULAR MEETING

The John Rutledge Club held its regular weekly meeting Monday evening in Petticoat College. Mr. Ca-

key president of the club presided over the meeting. After a rather long busi-

ness session the club took the case to be discussed.

A very interesting case was on docket for the evening which decided a ques-

tion in Tort. The attorneys were as follows: Messrs. Cantey and Peery for the plaintiffs and Messrs. Huskin and Whitehead for the re-

spondents. Mr. Spears acted as Chief Justice with Messrs. Oden and Zer-

key Associates. The case was decided in favor of the appellants.

"After an hour or two of the jokes which accompanies a gathering usual idle talk and the cracking ofMatlock's, the party returned to the

STAFFERS WITH STUCCO AND SPOTTY SPOTTING

In 1881. Hildom opened his "Jumbo" factory on the outskirts of the world. It could light 1000 lamps. Now there are Q.E. generators large enough to sup-

port Montezuma and Ridge Creek, each with four times the power of the old factory.

The General Electric Company makes some of the most electric apparatus which makes it possible to have electricity over great distances. It has put electricity into thousands of laboratories, scientists are now experimenting with voltages ten times as great as the high-

voltage generators of yesterday.

If you are interested in learning more about what electricity is doing, write for "Ask Mr. Hull," the second part of this issue.

And he has lived to see it

Back in 1883, Thomas A. Edison succeeded in transmitting electricity at 220 volts for one mile and a half—a achievement and a promise.

The promise was fulfilled a few months ago, when electricity at 220,000 volts was transmitted two hundred and forty miles to supply Los Angeles with light and power.

Now five billion dollars are invested in electric power plants. A stupendous figure that testifies to the alertness of thousands of college-trained men who have been leaders in the production and use of electric power.

The electrical era has only dawned. Each year some new machine or discovery makes it possible to apply electricity in unexpected ways. The graduate of today will find electricity directly and indirectly a means for even greater accomplishments, no matter what his calling in life may be.
