Auburn Knights' Singer

The American Society of Civil Engineers held its regular weekly meeting Tuesday, and offered several subjects for discussion.

John P. Owers, Columbia, was elected chairman, and presented a history of the civil engineers for the coming session. He spoke on the subject of current topics, with special emphasis on the presentation of lectures.

Corky Flower, also of Columbia, was chosen vice-president, and John W. Standing, Engineer, a new member of the board.

The society will hold its last meeting of the regular session next Tuesday night.

TELESCOPE

The University observatory was bestowed upon a new telescope, an eyepiece for the apparatus.

The pieces were made at the price of the University, and the students, all with whom the telescope has been used, have given a grant to its maintenance.

The telescope has been presented to the observatory, and it is believed that the telescope will be used by some of the students.

Endorsement into the observatory was received by the mechanics, and opening the door from the inside.

Senior Invitations

Invitations for the seniors were sent around May 27th and 29th. They may be obtained at a discount. Extra invitations may be obtained at the University, and all who wish may get them at the same prices.

The cards were to be received on May 29th and 30th, and may be obtained at the post office. Mrs. Moon announced that there would be more of these cards available than expected.

Hydrogen

All electric power plants would be put out of business if hydrogen could reach the uranium atoms. The hydrogen, in the form of hot water, would be used to generate electric power.

Slightly morbid

Hunt, professor of medicine, said that all electric power plants would be put out of business if hydrogen could reach the uranium atoms. The hydrogen, in the form of hot water, would be used to generate electric power.

The economic geology of the country is considered by a number of men. It has been found that the students made great progress toward the understanding of their subjects, and that the students have been more effective than expected.
