Capstone resident attacked near dorm

By AARON SHEPHEN
Staff writer

A student was attacked in the head and robbed last week by two unknown men as she was making her way back to Campine.

According to the police incident report, a 19-year-old female student was walking from her parked car on Prudner Street to her dorm room at about 11:10 p.m., Sept. 25, while two black males approached her from behind. The victim told police the two assailants were making "loud threats" behind her. She said one of the assailants then struck her on the temple with an unidentified object that he was holding in his hand. After the first suspect hit her, the second grasped her purse that was in her hand, kicked her with her right leg and took ten dollars from her wallet. The assailant then took the money from her purse.

The student ran through the parking lot and was able to flag down a passing campus police car. The reporting officers called DPD, who moved her to Baptist Medical Center. She was created for cuts to the head and was released early Monday.

The assailants have not been apprehended, but an investigation is under way, said Jerry Leath, assistant vice president for Law Enforcement and Safety.

According to the police report, one man was approximately 5'10" and weighed 250 pounds and was wearing dark-colored sweat pants. The other was about 5'7" and weighed 180 pounds and was wearing blue jeans.

The resident from Student Government was one of several, S.G. President Marie Louis-Marchette urges students to come in order to report.

"Paying yourself in these situations dramatically increases the risk of harm to others," she said.

jump start for a vehicle and an accident in the campus police parking lot.

"Jump start should be picked up by the telephone," said Baker.

Baker said that he was disappointed with the number of prank calls.

"Students should realize that every time a box is pushed, the police go to that location on campus. If the call is simply a prank, then you've just taken up an officer's time, which could've been used for a greater emergency," Baker said.

"There's a difference between simply sending assistance and an actual life and death situation," he said. When the call box is activated, police respond in a matter of seconds. MacPherson are reserved in all locations. "This is serious business," Baker said. We're not in the business of arranging parties, we just want assistance in case of call box.
